Our ERGONIC® K combines a ratchet, pivoting screwdriver and ERGONIC®-handle in one tool. The swivel head puts screws in difficult places within reach and allows exceptionally high torques up to 50 Nm. No need to replace the bits for switching between the different four angles of operation. The ratchet helps to work faster and more efficiently.

In combination with the unique ERGONIC®-handle, which adapts to your hand thanks to flexible cushions, the ERGONIC® K-ratchet is an allrounder for everyday applications. The perfect shape and integrated cushions provide optimum torque transmission and reduce strain on hand and joints.

Because we know that your hand is your most important tool!

The ERGONIC® K-ratchet is available individually or in user-specific assortments with bits and socket wrenches in a strong and safe strongbox or in the practical belt pouch for mobile use.
