E[⚡]slim
ERGONIC[®] (pat.)
U.S. Patent No 7,877,843

**Handle
30%
slimmer!**

**The first
„double-slim“
1000 Volt-screwdriver
for electricians!**

**AC 1000V
IEC 60900 : 2004**

**Insulation
up to 50%
slimmer!**

**made in
Germany**

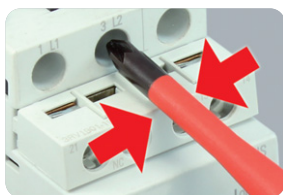

Handles on common insulated screwdrivers are a compromise between the expectations of a mechanic (big handle for high torque) and the needs of the electrician (slimmer handle for precision jobs at medium torque). **Felo E-Slim** was developed exclusively to meet the requirements of the electrician.

Handle is 30% slimmer:

ideal for electrical installation (precise work at medium torque).

Due to the patented **Felo Ergonic** cushion technology this is possible without any loss of comfort or maximum torque. **ERGONIC** interlocks with the user's hand and thus provides both a maximum of comfort and a significantly higher torque than competitor's handles of the same size.

AC 1000V
IEC 60900 : 2004

Insulation is up to 50% slimmer:

even deep seated screws can be reached without compromising safety.

The **Felo** double-slim concept makes **E-Slim** 1000 Volt-screwdrivers ideally suited for the requirements of the work of electricians.

Without compromises.
